5 Best Practices for Using Parchment

parchment send

Parchment Send was developed so you have more time to focus on your students and create a college-bound culture. That means you won't be hearing, "Where's my transcript?"

Here are some best practices we recommend to help you make the most of your Parchment platform.

1   Set up parent support tables at school events or senior meetings.

2   Filter all student requests through ONE place: your school and/or district webpage.

3   Have students add their personal email to their Parchment account.

4   Use Chrome or Firefox to provide optimal functionality with Parchment.

5   Periodically clear your cache, cookies, and browser history for best performance.
